

This architectural floor plan depicts a corner of a building. A large, light gray area with a diagonal cross-hatch pattern represents a curved wall or a large room. Yellow structural elements, including beams and columns, are shown. Two circular patterns with crosshairs are visible, one in the upper right and one in the lower left. A dashed line connects a black dot in the center to the corner of the building. The plan is enclosed by a dashed line on the right and bottom, and a solid line on the top and left.
